42" Pad Mount

Electrical Materials Un-metered RV pedestals provide weatherproof electrical service, from 20 to 100A 120/ 240V single phase.

Our pedestals are installed throughout the U.S and Canada. Installations include private RV parks, state parks, national forests, national parks, county parks and fairs and municipal parks.

The rotating breaker cover and top access panel both have provisions for locking. Standard breaker and receptacle configuration includes a 30A 125V receptacle, 50A 125/250V NEMA 14-50R receptacle and 20A 125V GFCI receptacle. Other receptacle configurations are also available including 30/20, 50/20, 30/30/20, 20/20/20, 20/20 and 20 amp.

Pedestals are constructed of 16 gauge G90 galvanized steel which is then poly powder coated. An option for stainless steel construction also available.
